

Weighbridge

“Weighbridge” allows you to manage the weighbridge in & out weighing operations, showing the status messages of the scale, the weighing operations carried out, the selected memories (customers, materials and vehicles), net, gross and tare weights. It is possible to interface any type of printer (POS, TMU or system printer) in order to manage both the information of the weighs and the archive reports. This software is suitable for any types of companies, available both on CB Touch indicator and on PC.

FEATURES:

This software allows two types of operation:

- Storage of single weigh with introduction of the vehicle tare
- Storage of input / output weigh, with recall of input weigh by vehicle plate or memory number
- Management of single or double scale (A+B o A and B)
- Integration of new vehicles, materials, customers and users with the possibility to modify or delete items
- Ability to search by user, customer, license plate and material
- Filtered display of the weighing operations
- User recognition through login
- Single weigh printing
- Entry / exit Print
- Management of printing tags with the possibility to add company logo (system printer)
- Memory management
- Export of lists in CSV format
