

Axle Weighing

The Axle Weighing platform, complete with weight indicator, allows you to calculate the weight of a vehicle in transit by adding up the various axles weighed dynamically. Designed for floor-level installation, the load floor is made from embossed steel plates (checkered plates) of big thickness, the crowning board is signalling. Operation with IP68 load cells. CE-M approvable.

FEATURES:

- Dimensions: 3 x 1 mt
- Maximum capacity: 20.000 kg
- Floor-level version
- Sturdy loading surface made of high thickness anti-slip sheet in painted steel
- Supporting structure composed by steel beams
- Anti-corrosion treatment
- Signalling crowning board
- Operation with IP68 load cells
- Inspection hatches for cell maintenance
- Equipped with IP65 ABS weight indicator, LED display and graphic LCD with 25-key keyboard
- Thermal printer (optional)
