

Semi-automatic Bench Top Capping Machine

The semi-automatic bench top capping machine, complete with an interchangeable capping head, is suitable for plastic pre-threaded caps, twist-off caps and pressure caps, made entirely of stainless steel. By pressing the two side buttons at the same time, the clamps tighten so that the jar remains stationary, and the head goes down, screwing the cap.

FEATURES:

- Dimensions: 34 x 35 x 90 cm
- Structure completely in stainless steel
- Compressed air operation 6bar
- Double flush button
- Jar diameter: 20mm to 110mm, maximum height 320mm
- Automatic self-regulation of column height for size change
- Piston block anti-rotation of the jar
- Torque adjustment with manually adjustable clutch
- Clamp block-jar supplied for medium-large or medium-small sizes
- Fully removable machine for easy cleaning
