The semi-automatic filling machine is characterized by precision, reliability, versatility of use and ease of use. The filling is entrusted to volumetric piston dosers made entirely of AISI316 stainless steel. This allows you to precisely dose liquid and dense food, cosmetics, chemicals and parapharmaceuticals, even hotter and with suspended pieces, in plastic and glass bottles or jars. In the **food industry**, the filling machines are suitable for the dosage in jars of:

- Jams and Honey
- Sauces, spreads, yoghurt
- Pesto, Ragu, Pate, and Soups
- Pastry and ice-cream products.

In the **cosmetic and galenic sector**, they allow the dosing in plastic or glass containers of:

- Shampoo and body wash
- Creams and Oils
- Hair gel and hand sanitizing gel
